

Owen Moloney

omoloney@fordham.edu | (917) 681-2295 | Floral Park, NY | [Portfolio](#) | [GitHub](#)

Software Engineer with hands-on experience delivering full-stack solutions and scalable backend systems. Built a Java-based void-detection estimating tool that eliminated 50+ hours of manual work quarterly and an AI-powered personal assistant integrating Twilio, Google Calendar, Grok AI, and Stripe/Plaid APIs. Experienced in microservices architecture, OAuth 2.0 flows, cloud deployments, and CI/CD pipelines.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, C++, Go, HTML/CSS

Frontend: React, Vue.js

Backend: Node.js, Express.js, REST API Design, Microservices Architecture, Supabase, MongoDB, Firebase Firestore

Infrastructure/Tools: AWS, Docker, Git/GitHub, CI/CD Pipeline, Cursor, Claude Code, Supabase Edge Functions, Postman

Authentication & Security: OAuth 2.0 (incl. PKCE), Firebase Auth, Role-Based Access Control (RBAC), JWT

Core Skills: Object-Oriented Programming, Data Structures & Algorithms, System Design, Distributed Systems, Agile Methodologies

EDUCATION

Fordham University

Bronx, NY

B.S. Computer Science, Major GPA: 3.5

September 2022 - May 2026

CERTIFICATION

JPMorganChase Software Engineering Job Simulation on Forge

Completed on July 27, 2026

- Built a Kafka-integrated Spring Boot microservice with JPA/H2 persistence, external REST API integration, and Maven-verified transaction processing

ACADEMIC PROJECTS

Data Mining, CRN# 4631

January 2026 - May 2026

ATS Screening

- Developed a resume-to-job matching system in Python using TF-IDF vectorization, Naive Bayes category classification, and cosine similarity ranking to shortlist candidates for job postings.

SOFTWARE ENGINEERING EXPERIENCE

The Social Company of the United States, Inc.

New York, NY

Full-Stack Software Engineer

December 2025 – June 2026

- Built a full-stack AI-powered personal assistant in 5 months, integrating Twilio SMS, Google Calendar OAuth, Grok AI, and Stripe, enabling users to manage personal info from a single web app and iMessage
- Designed and deployed backend services using a microservices architecture with Supabase Edge Functions, reducing typing latency to under 100ms and response time to under 450ms.
- Implemented OAuth 2.0 authentication flows and built CI/CD pipelines for automated cloud deployment, shortening release cycles and strengthening platform security, for a production-ready interface and backend.

Architectural Wood Flooring Inc.

New York, NY

Software Engineer

August 2023 - Present

- Built and maintained a Java Swing estimating app for calibrated floor-plan takeoffs (rooms, obstacle/void subtraction, waste and pricing), reducing 50+ hours of manual takeoff per quarter.
- Packaged cross-platform releases with a shaded fat JAR and jpackage installers (macOS/Windows), published via GitHub Actions for non-technical self-service install.

Tennis Nomad

New York, NY

Software Engineer Intern

May 2025 - September 2025

- Built and shipped a secure authentication system using Firebase Auth and role-based access control in 4 weeks, supporting admin and user permission tiers across the platform.
- Built and maintained RESTful APIs (Node.js/Express) powering 18 full-stack features end-to-end, from database schema to UI, with unit tests across frontend and backend services.

Alpha Prime Tech

New York, NY

Software Engineer Intern

May 2024 - August 2024

- Completed 8 applied backend training projects covering object-oriented programming, data structures, and system design in Java.
